

Mount Kit for Amazon Echo Dot (Alexa)

Our innovative solution provides all you need to custom install your Amazon Echo Dot (Gen 1&2) into the ceiling or wall of any room and extend Alexa’s audio output into your own speakers. A single Cat cable carries both the power for the Dot and its audio signal back to your equipment over a distance up to 240 feet. We are certain you will find this feature not only incredibly useful and convenient but also fun!

What’s Included:

Ceiling / Wall Mount bracket with custom gasket that securely holds the Amazon Echo Dot (Gen 1&2).

Two grille cover options: one that reveals a modest trim similar to canned lighting; one “trimless” design that covers the entire mount.

UL listed POE (power-over-ethernet) power supply, injector, and custom power/audio splitter & micro USB adapter

2 stereo audio adapters: 1 plugs into the Dot; 1 plugs into your audio equipment

Best Uses:

Connect to a Whole House Audio System. The Dot becomes a source that you can control by voice (and within the Alexa app) and easily make available to other zones in the home.

Build a Hybrid Wireless Whole-House Audio System. Create individual zones and then pair the Dots together to have multiple zones listen to the same source.

Connect to Any Amplifier with ADS™ (Auto Detect and Switch). When used as the primary input, the audio from the Dot is heard whenever you need it, even if you were already listening to a different source.

How to Install:

We're here to help! If you have any questions or would like to discuss your home audio needs in general, we are available toll free: 866-HTD-AUDIO (866-483-2834) and local: 972-312-9900, M-F 8am-6pm Central.
